

由于DomainMismatch故障、控制器上的LED指示灯出现故障

https://kb-cn-stage.netapp.com/on-prem/ontap/OHW/OHW-KBs/Fault_LED_on_controller_due_to_Dom...

Updated: Wed, 22 Apr 2026 07:32:38 GMT

适用场景

- AFF C400
- AFF A800
- AFF A700
- NS224磁盘架

问题描述

- 控制器上的故障LED亮起
- 在EMS中接收以下警报

```
[Node-02: schmd: hm.alert.raised:alert]: Alert Id =  
DomainMismatchFromNodeToShelf_Alert , Alerting Resource =  
Switch-02 (XXXXXXXXXXXX) raised by monitor system-connect  
[Node-02: mgwd: callhome.hm.alert.major:alert]: Call home for Health Monitor  
process schm: DomainMismatchFromNodeToShelf_Alert [Switch-02 (XXXXXXXXXXXX)] .
```

- 出现运行状况警报

```
Cluster::> system health alert show
      Node: Node-02
      Alert ID: DomainMismatchFromNodeToShelf_Alert
      Resource: Switch name: Switch-02 (XXXXXXXXXXXX)
      Severity: Major
      Indication Time: Sat Apr 02 16:24:02 2022
      Suppress: false
      Acknowledge: false
      Probable Cause: The storage domain between the nodes Node-01,
                     Node-02 and switch Switch-02 is different
                     from the domain between the switch and shelves 3.1,
                     3.2.
      Possible Effect: This issue will affect conversions to direct-attached
                     storage.
      Corrective Actions: Connect the switch Switch-02 to both the node and
                        the shelves with the same storage domain, following
                        the guide applicable to your shelf.
```
