

CXone Mpower EXPERT

无法从失败的集群加入尝试中删除过时的条目

https://kb-cn-stage.netapp.com/on-prem/ontap/OHW/OHW-KBs/Unable_to_remove_stale_entries_from...

Updated: Wed, 22 Apr 2026 10:27:28 GMT

适用场景

- ONTAP 9
- Data ONTAP 8.x
- MDV 审核 (mdv_aud) 卷
- 已启用 SVM/server 审核

问题描述

加入失败后、同一节点的第二个版本将以不同的名称添加到集群中。初始尝试仍会显示上一个节点为“缺少”和“不符合条件”。任何强制退出尝试都将失败，并显示以下任一内容：

```
Error: command failed: [Job 30029] Job failed: Failed to disable cluster-scoped metadata volume support prior to remove-node operation. Reason: [Job 30030] Job failed: An error occurred in the reception and processing of the API reply from the appliance. Error: command failed: [Job 880010] Job failed: Failed to disable cluster-scoped metadata volume support before remove node operation. Reason: [Job 880011] Job failed: Failed to delete volume
```
