没有凭据无法禁用Kerberos接口

https://kb-cn-stage.netapp.com/on-prem/ontap/da/NAS/NAS-KBs/Can_t_disable_kerberos_interface_wi...

Updated: Wed, 22 Apr 2026 08:48:48 GMT

适用场景

- ONTAP 9
- NFS
- Kerberos

问题描述

即使使用-force选项、也无法在没有凭据的情况下禁用Kerberos接口：

```
::> vserver nfs kerberos interface disable -vserver SVM1 -lif LIF1 Username: Error: command failed: The "admin-username" parameter is empty. The "admin-username" and "admin-password" cannot be empty. Use "-force" if "admin-username" and "admin-password" is not available ::> vserver nfs kerberos interface disable -vserver SVM1 -lif LIF1 -force Error: invalid argument "-force"
```
