Updated: Wed, 22 Apr 2026 08:24:19 GMT

适用场景

- ONTAP 9.7
- NFS

问题描述

ONTAP 9.7 NFS 服务器上的 NFS 客户端挂载间歇性失败，并报告此消息 `Connection reset by peer`:

```
systemd[1]: mynfs-myexport.automount: Got automount request for /mynfs/  
myexport, triggered by 12345 (ls)  
systemd[1]: Mounting /my-nfs/my-export...  
mount[12348]: mount.nfs: Connection reset by peer  
systemd[1]: mynfs-myexport.mount: Mount process exited, code=exited status=32  
systemd[1]: mynfs-myexport.mount: Failed with result 'exit-code'.  
systemd[1]: Failed to mount /mynfs/myexport.
```
