

无法重置Vserver上的密码

https://kb-cn-stage.netapp.com/on-prem/ontap/da/NAS/NAS-KBs/Unable_to_reset_password_on_the_...

Updated: Wed, 22 Apr 2026 05:16:22 GMT

适用场景

- ONTAP 9
- CIFS

问题描述

- 无法使用重置CIFS服务器密码 `vserver cifs domain password reset -vserver vserver_name`

示例：

```
"Error: command failed: Password update failed. Reason: SecD Error: no connections available."
```

```
ERROR secd.kerberos.preauth: Kerberos pre-authentication failure due to out-of-sync machine account password for vserver (SVM).
```

- `diag secd show-creds` 的 `Command` 输出将正常显示所有凭据
