### 适用场景

ONTAP 9

### 问题描述

由于要删除的节点上的 MDV\_CRS 卷，无法将节点从集群中取消加入：

```
Error: command failed: [Job 51523] Job failed: Failed to disable cluster-scoped metadata volume support prior to remove node operation. Reason: Aggregate "aggr1" cannot be deleted because it contains a system volume named "MDV_CRS_50106aaae75a11e48bad00a09865dcc1_B". This volume must be moved to another aggregate before aggregate "aggr1" can be deleted.
