This document and the information

Description: Ethernet switch "nsglb224" with IP address "10.20.9.233" is not reachable via SNMP. Incorrect SNMP community string might be configured on the Ethernet switch.

Corrective Actions: Check the SNMP community string on the Ethernet switch to verify that the expected community string is configured. Use the "system switch ethernet show -snmp-config" command to view the expected community string.

Possible Effect: Ethernet switch communication problems and accessibility issues.

- 节点管理端口和交换机管理端口之间的网络ping操作正常：

```
::> network ping -vserver <node_management_LIF_SVM> -lif <node_management_LIF>
-destination <switch_management_IP>
<switch_management_IP> is alive
```
