由于 FlexCache 错误，无法删除卷

https://kb-cn-stage.netapp.com/on-prem/ontap/Ontap_OS/OS-KBs/Unable_to_delete_volume_due_to_...

Updated: Wed, 22 Apr 2026 04:08:30 GMT

适用场景

- ONTAP 9.3或更高版本
- CVO
- FSx

问题描述

无法删除卷、因为出现错误、指出此卷为FlexCache卷。

```
cluster::*> volume delete -vserver vserver1 -volume v11
```

```
Error: command failed:Volume "v11" in Vserver"vserver1" is an origin of a FlexCache volume. To delete an origin of a FlexCache volume, you must first delete the FlexCache volumes that are in relationship with the origin. Use the "volume flexcache origin show-caches-origin-vserver vserver1 -origin-volume v11" command to show the FlexCache volumes associated with the origin.
```

但是、当您尝试将其作为FlexCache卷删除时：

```
cluster::*> vol flexcache delete -vserver vserver1 -volume voll
```

```
Error: command failed: Cannot delete volume"voll" in Vserver"vserver1" because it is not a FlexCache volume. Use the "volume delete -vserver vserver1 -volumevoll" command to delete the volume.
```

在查看原点时：

```
cluster::*> volume flexcache origin show-caches -origin-vserver vserver1 -origin-volume voll
```

```
