问题描述

- 在运行 ONTAP 9.14.1P7 及更高版本的 AFFA800 上，系统重新启动以进行手动接管，但用户未启动接管：

```
Tue Oct 01 17:06:03 +0000 [node02: cf_main: cf.fsm.takeover.nfo:info]: Failover monitor: takeover attempted after "storage failover takeover" command.
```

- 接管前会看到以下错误：

```
Tue Oct 01 14:37:04 +0000 [node01: intr: netif.fatal.err:alert]: The network device in slot 0 encountered fatal error e0a/e0b.
```
