## COETP-373765：以太网交换机运行状况监控报告序列号未知、日志收集停止

<https://kb-cn-stage.netapp.com/on-prem/ontap/OHW/OHW-Issues/CONTAP-373765>

Updated: Wed, 22 Apr 2026 07:30:14 GMT

### 问题描述

- 对于1个或多个交换机、一个或两个类型的日志收集均停止：

```
::*> system switch ethernet log show -instance -device switch1
      Switch Name: switch1
      Periodic Log Enabled: true
      Periodic Log Status: Periodic log collection has been scheduled to run every
hour.
      Support Log Requested: true
      Support Log Status: Waiting for the next Ethernet switch polling cycle to
begin support collection.
```

- "system switch ethernet show"的输出中显示了一个"未知"(小写u)序列号
