

COTAP-180058 : 用户无法通过对角色/API/storage/配额 具有所有权限的 REST修改配额状态

https://kb-cn-stage.netapp.com/on-prem/ontap/Ontap_OS/FS_Issues/CONTAP-180058

Updated: Wed, 22 Apr 2026 09:37:40 GMT

问题描述

- REST API fails with "not authorized for that command" for users while trying to create a quota with /api/storage/quota as all privilege
- The role QuotaRest has the below details:

```
cluster1::> security login rest-role show -role QuotaRest
Role Access Vserver Name API Level ----- cluster1 QuptaRest /api/storage/
quota all
```

- However, when creating a new quota rule with a REST call it fails due to insufficient permissions:
{ "error": { "message": "not authorized for that command", "code": "6" } }
- The equivalent in ZAPI works fine
