Updated: Wed, 22 Apr 2026 08:14:00 GMT

问题描述

- Two volumes on the same node have latency:
 - One is due to QoS latency due to https://kb.netapp.com/onprem/ontap/P...solution_Guide
 - One shows in Network Processing/Network delays.
- The number of QoS rewinds is very high (50,000 or more) as determined from the link above.
- The QoS policy cannot be adjusted due to end customer commitments based upon a QoS policy limit.
