Updated: Wed, 22 Apr 2026 07:30:01 GMT

适用于

ONTAP 9

问题描述

使用 TCP 加密协议创建日志转发失败。

```
::> cluster log-forwarding create -destination <server_IP> -protocol tcp-encrypted -facility user
Testing network connectivity to the destination host server_IP.
```

```
Error: command failed: Cannot connect to destination host server_IP, port 443 from node "node_name". Reason: Failed TLS/SSL handshake: certificate verify failed: unable to get local issuer certificate. Verify connectivity to desired host or skip the connectivity check with the "--force" parameter.
```

对于事件日志转发：

```
cluster:::> event notification destination check -node node-01 -destination-
```
